PROFESSIONAL SUMMARY

Staff Engineer with 5+ years of experience designing and scaling enterprise backend platforms using ASP.NET Core and Microservices architecture. Specialized in Clean Architecture, Domain-Driven Design (DDD), CQRS, and Azure cloud integrations. Proven track record delivering production-grade APIs, optimizing performance, and supporting mission-critical client systems.

TECHNICAL SKILLS

Backend: ASP.NET Core, ASP.NET MVC, Web API, Entity Framework, Fluent API

Architecture: Clean Architecture, Domain-Driven Design (DDD), Microservices

Patterns: SOLID, CQRS, MediatR, Dependency Injection

Languages: C#, SQL, JavaScript, HTML, CSS, LINQ, C++

Databases: SQL Server, PostgreSQL, MySQL, MongoDB

Cloud & DevOps: Azure App Services, Functions, Service Bus, Key Vault, Docker, CI/CD, Azure DevOps

Tools: Git, GitHub, TFS, JIRA, Postman, Swagger, Visual Studio, VS Code, Application Insights

WORK EXPERIENCE

Staff Engineer | Odessa Inc

Bengaluru, India

Jul 2022 – Present

- Architected and enhanced scalable backend services for enterprise leasing platforms using ASP.NET Core, Clean Architecture, and Domain-Driven Design, improving modularity, extensibility, and long-term maintainability of core financial systems.
- Designed and implemented high-throughput REST APIs leveraging CQRS and MediatR, enabling separation of command and query workloads and improving system performance and testability.
- Led secure enterprise integrations using Azure Service Bus for asynchronous processing and Azure Key Vault for secrets management, ensuring compliant and secure cross-service communication.
- Engineered a Cross-Site Hybrid Portal enabling centralized execution of distributed platform actions through API orchestration and JavaScript bridge layers, reducing operational friction across client systems.
- Implemented real-time chatbot capabilities using SignalR, enabling live customer interaction workflows integrated directly into enterprise portals.
- Played a key role in production support and critical incident resolution for global clients including HPE, MCB, and TICF, diagnosing performance bottlenecks, fixing data inconsistencies, and stabilizing live environments.
- Optimized CI/CD pipelines using Azure DevOps, improving deployment automation, build reliability, and release traceability across environments.
- Mentored junior developers on Entity Framework optimization, LINQ query design, and Clean Architecture implementation patterns.
- Awarded the **Launchpad Innovation Award** for delivering high-impact platform enhancements.

Software Developer | V Software Consulting

Bengaluru, India

Feb 2022 – Jul 2022

- Modernized legacy monolithic applications by decomposing them into ASP.NET Core Web API microservices, improving scalability, deployment independence, and service isolation.
- Designed and developed reusable RESTful services using C# and Entity Framework, standardizing backend communication layers.

- Implemented repository and service layer abstractions to enforce separation of concerns and improve code testability.
- Collaborated with frontend teams to integrate backend APIs with responsive UI modules using JavaScript, jQuery, and Bootstrap.
- Strengthened version control and collaboration workflows through GitHub branching and pull request governance.

Software Engineer | Wipro

Bengaluru, India

May 2019 – Feb 2022

- Developed and maintained enterprise insurance platforms for AVIVA using ASP.NET MVC/Core and SQL Server, supporting business-critical policy processing systems.
- Maintained and refactored legacy VBScript modules, ensuring operational continuity while enabling gradual modernization.
- Migrated performance-sensitive components to C++/C#, improving execution efficiency and reducing processing latency.
- Built secure internal APIs for validation workflows, structured data processing, and regulatory compliance handling.
- Managed cloud deployments and infrastructure monitoring on AWS EC2, supporting stable production releases.
- Utilized Git, Bitbucket, and JIRA for release management, defect tracking, and agile delivery cycles.

EDUCATION

Bachelor of Computer Applications

St. Joseph's College, Kerala, India

CGPA: 7.75

2016 – 2019
